**SAVETHEDATE**

Rome, June 24<sup>th</sup> - 28<sup>th</sup> 2019

From 24<sup>th</sup> to 28<sup>th</sup> June 2019, Bambino Gesù Children’s Hospital will host in Rome the 5th International Conference of Oesophageal Atresia (INoEA) - in collaboration with the European support group for the Esophageal Atresia (EAT) and the Italian Association of Families with Esophageal Atresia (FATE)- and the 2<sup>nd</sup> Meeting of the International Network of Pediatric Airways Team (INPAT), organized together with the Airway Team of Gaslini Institute of Genoa.

It promises to be a memorable weeklong event in Rome – held in the year that marks the 150<sup>th</sup> anniversary of the Bambino Gesù Children’s Hospital.

This will be the first international joint session of INoEA and INPAT and it will bring together professionals specialized in the treatment and management of complex and fragile patients affected by Esophageal Atresia/Tracheo-esophageal fistula and other aerodigestive tract anomalies.

The INPAT meeting will start on 26<sup>th</sup>, on 27<sup>th</sup> June INoEA and INPAT will come together in one place to discuss the latest scientific and medical research in their fields. On 28<sup>th</sup> INoEA will conclude its meeting and the esophageal atresia week.

On 24<sup>th</sup> and 25<sup>th</sup> June there will be a Workshop that will offer practical live training sessions on endoscopic, surgical and minimally invasive procedures. Participants will be involved in hands-on practical activities, simulation boxes, demonstrations of rehabilitation strategies and techniques for both medical teams and families. There will be activities dedicated to children born with Esophageal Atresia/Tracheo-esophageal fistula, aimed at addressing some of their most persistent eating difficulties. It’s Rome, so food will be involved!

These patients require dedicated multi-disciplinary teams, working in close collaboration with various specialists, families, nurses and other health care providers. In this spirit, the workshops will offer a unique opportunity to meet the leading specialists in the world, to discuss and share ideas on how best to tackle some of the most controversial and pressing issues of pediatric surgery. Young and adult patients, as well as their parents and caretakers, will actively participate in the workshop, bringing their own experiences, the results of recent studies and will pose questions on the most challenging issues related to the quality of life of patients, while learning about state-of-the-art surgical and rehabilitation techniques.

Rome is the Eternal City where legend has it a she-wolf nourished to good health the city’s most famously fragile twins, Romolo and Remo. In a myth that Romans are fond of retelling, the twins later grew up to found this wondrous city. What’s true today is this: together, we can improve the lives of those born with these rare diseases by developing and sharing best-practice. We look forward to seeing you in Romolo and Remo’s city where we can make important new contributions to this goal.

INPAT

Congenital and acquired airway stenosis, tracheobronchomalacia, vocal cord dysfunction, laryngeal web and cleft, Airway stenosis, Laryngotracheal bronchomalacia and malformation.

JOINT MEETING INoEA & INPAT

Upper foregut and cardiovascular anomalies, Aerodigestive team organization, Comorbidity, Sequelae/complications, Home airway/digestive support, New tools in aerodigestive tract, Tracheal team activity for Albatros cases.

INoEA

Prenatal diagnosis and counselling, Long-gap definition and management at birth, Systematic approach and definition of long-gap esophageal atresia Stricture dilation and stenting, Tissue Engineering.

Functional disorders evaluation and rehabilitation, Transitional care, Evolution of problems in adult age, Rehabilitation strategies, Psychosocial issues.

FATE-EAT

Dysphagia management, Quality of life assessment methodologies, Good practices in follow-up, Role of support groups at national and European level in supporting families and medical teams, Opportunities for Patients Empowerment through the European Research Network (ERNICA), Home rehabilitation strategies, Practical demonstrations with patients and families of stoma management and mechanical airways support, Practical activities for children and families on food manipulation, cooking labs and observation of eating disorders with therapists and psychologists, Pet therapy.

LOCATION

- WORKSHOP [June 24<sup>th</sup> - 26<sup>th</sup>]:  
BAMBINO GESÙ CHILDREN’S HOSPITAL, SALVIATI HALL
- INPAT-INoEA Meeting [June 26<sup>th</sup> - 28<sup>th</sup>]:  
AULA MAGNA AT THE URBANIANA UNIVERSITY

REGISTRATION FEES

- Doctors:
- INoEA: ..... € 450;
  - INoEA + Workshop: ..... € 700;
  - INPAT: ..... € 450;
  - INPAT + Workshop: ..... € 700;
  - Joint Meeting INoEA-INPAT: ..... € 700;
  - Joint Meeting + Workshop: ..... € 1000.
- Other allied health professionals:
- INoEA: ..... € 300;
